

CLIENT TESTIMONIALS

“Zbig has always impressed me with his disciplined and holistic approaches to business problems. The methods he uses cause people to think broadly about the situation, deeply about the underlying drivers, creatively about alternate solutions, and holistically about what may be required to support the solution for true sustainability.”

Brian McKibben, VP Management Consulting, The Cumberland Group (Consulting)

"Skiba Consulting provided a planning process that was customized to our specific needs, challenged us to look at our business from a different perspective, and balanced the different aspects of our business. The results have been a clear vision for our future, specific goals and metrics to achieve our vision, and a management team focused on those activities that will make the biggest difference."

Bette Fetter, Founder and CEO, Young Rembrandts (Art Education)

"Zbig helped to point out roadblocks to growth which were not immediately obvious to us, for example an over-reliance on the top management of the company. We now have a plan to grow the leadership skills of other company employees."

Lisa Dombrowski, President, Logica3 (Corporate Communications)

“Zbig’s expertise in how to generate a concise yet detailed plan, best practices towards execution of this plan, and eagle eye for what pieces might be missing and could be revised, has been invaluable. Already I have seen significant improvement in my ability to develop and prioritize action plans for the many moving parts of Climate Cycle, which improves my ability to better prioritize next steps while seeing the big picture more clearly. I am confident this increased competence will keep growing as we continue our work together.”

Joey Feinstein, President, ClimateCycle (Not for Profit)

“I am running 3 separate businesses (passions) and sometimes focus can get lost. Zbig has helped me define and prioritize my business plans while setting clear goals with flexibility to redirect when necessary. The process was very direct yet creative. Thanks Zbig.”

Brian Wismer, FunWizz Entertainment (Entertainment and Education)

"We found that Zbig was no nonsense, organized, and understood how to take us through the planning process, which is what you hope a consultant will bring to the table."

Gary Gunderson, President, Recycle Technologies (Recycling)

“I would like to take this opportunity to highly recommend Zbig Skiba for business consulting services. Zbig was a critical member of our company’s Finance team for several years and his efforts made a significant contribution to the financial and operational management of our company. I believe Zbig has the solid business experience and leadership skills needed to be successful in a wide variety of client circumstances.”

Walt Wagner, CFO & CIO, Ameritech New Media (Cable TV Services)
